

INDEX OF PAPERS PUBLISHED IN 2015

Abramyants T.G., Galyaev A.A., Maslov E.P., Rudko I.M. and Yakhno V.P. Mobile object evasion from detection by a system of heterogeneous observers in threat. — N 2. — P. 31–37.

Afanasiev V.N. Algorithmic method of control design for nonlinear uncertain system. — N 3. — P. 12–19.

Aleskerov F.T., Belousova V.Yu., Petrushchenko V.V. Measuring higher education institutions' efficiency: data envelopment analysis and stochastic frontier approach. — N 5. — P. 2–19.

Andreev K.V. Optimal trajectories for unmanned aerial vehicles tracking the moving targets using linear antenna array. — N 5. — P. 76–83.

Asratian R.E. Organization of pipeline processing in multi-server network environment. — N 6. — P. 76–81.

Bazhenov S.G., Egorov N.A., Kulida E.L., Lebedev V.G. Control of trajectory and speed of the aircraft when landing in rough terrain. — N 2. — P. 45–51.

Bogomolova I.S., Grinenko S.V., Zadorozhnyaya E.K. Human development index and gender equality: indicators interconditionality. — N 1. — P. 38–46.

Breer V.V., Mirzoyan G.L., Novikov D.A. Innovative cournot oligopoly. — N 5. — P. 45–57.

Budynkov A.N., Masolkin S.I. The problem of choosing kernel for one-class support vector machines. — N 6. — P. 70–75.

Dartau L.A. Public administration of health and quality of life. Part 1. Object, subjects, duties and responsibility. — N 2. — P. 52–59.

Dartau L.A. Public administration of health and quality of life. Part 2. Organizational and legal technology edifa. — N 3. — P. 40–48.

Edelev A.V., Senderov S.M., Pyatkova N.L. The use of geographic information technologies for energy security problems research. — N 2. — P. 68–74.

Enaleev A.K. Optimal coordinated mechanisms at system with multiple active elements. — N 3. — P. 20–28.

Geraskin M.I., Chkhartishvili A.G. The simulation of oligopoly market structures for unlinear demand and agents costs functions. — N 6. — P. 10–22.

Geraskin M.I., Manakhov V.V. Optimization of interaction in multi-agent closely connected system «retailer — bank — insurer». — N 4. — P. 9–18.

Glumov V.M., Puchkov A.M., Seleznev A.Ye. Synthesis and analysis of attitude control algorithms of unmanned vehicle with two control surfaces. — N 3. — P. 69–78.

Gorbaneva O.I., Ougolnitsky G.A., Usov A.B. The models of corruption in hierarchical control systems. — N 1. — P. 2–10.

Goroshko I.V., Bondarenko Yu.V. Social and economic indicators of region development coordination: concept and mechanisms. — N 1. — P. 63–72.

Granin S.S., Mandel A.S. Stationary inventory control strategies in logistic systems under inflation. — N 4. — P. 19–24.

Grinyak V.M., Devyatisilny A.S. Marine safety estimation expert system based on neural fuzzy logic network. — N 4. — P. 58–65.

Ivanov V.P., Kablova E.B., Klenovaya L.G. Formalization elements of complex dynamic systems evolutionary improvement on the basis of innovations and reliability control. — N 4. — P. 41–50.

Jandybaeva N.V., Kushnikov V.A. Mathematical models, algorithms and complexes of programs for monitoring the efficiency of the educational activities of the higher school. — N 1. — P. 53–62.

Kadyrova A.R. Employee turnover: review of the problem. Part 1. Economic and mathematical models of top management turnover. — N 2. — P. 2–12.

Kadyrova A.R. Employee turnover: review of the problem. Part 2. Economic and mathematical models of non-management employees turnover. — N 3. — P. 2–11.

Kasatkina E.V., Vavilova D.D. Information-analytical system to forecast the factors of regional development. — N 4. — P. 25–34.

Kedrin V.S., Kuzmin O.V. Recurrent relations of additive sequences for periodic functions. — N 2. — P. 24–30.

Klimovitsky M.D., Larin A.A. Adaptive control system of heat treatment of steels. — N 4. — P. 51–57.

Korepanov V.O., Novikov D.A. Models of strategic behavior in the diffuse bomb problem. — N 2. — P. 38–44.

Korotin V.Y., Ulchenkov A.M., Islamov R.T. Oil company risk-based value management under oil price uncertainty. — N 6. — P. 46–52.

Kozhevnikov A.V., Kochneva T.N., Kochnev N.N. The application of modal control in electromechanical systems. — N 6. — P. 2–9.

Krasnova S.A., Utkin A.V. The sigma-function for problem of states and disturbances observers synthesis. — N 5. — P. 27–36.

Krivoshchev O.V. Optimization of credit leverage maximizing expected rate of return. — N 6. — P. 35–45.

Mardanov M.D., Rzaev R.R., Jamalov Z.R., Hasanov V.I. One approach to the assessment the competitiveness of higher education institutions. — N 6. — P. 23—34.

Maslak A.A., Moiseyev S.L., Osipov S.A. Comparative analysis of rasch model parameters estimates obtained by maximum likelihood and least squares methods. — N 5. — P. 58—67.

Mastaliyev R.O. Necessary optimality conditions of singular controls in the optimal control by discrete-continuous system. — N 1. — P. 11—18.

Mironov A.M., Miheev A.G., Pyatetsky V.E. The algorithm of check of number of control flows in business process instance finiteness. — N 1. — P. 30—37.

Novikov D.A. Models of informational confrontation in mob control. — N 3. — P. 29—39.

Podlazov V.S. Extended multiring of diameter 2. — N 4. — P. 35—40.

Pshikhopov V.Kh., Medvedev M.Yu., Gurenko B.V. The basic algorithms of adaptive position-trajectory control system of mobile objects. — N 4. — P. 66—74.

Rahimov A.B. Solution of optimal control problems under piecewise constant, piecewise linear, and piecewise given on a class of functions control actions. — N 2. — P. 13—23.

Rezchikov A.F., Tsvirkun A.D., Kushnikov V.A., et al. Methods of predictive estimates of socio-economics national security indicators. — N 5. — P. 37—44.

Rostova E.P. Model of stimulation at risk management in the system of industrial enterprises. — N 1. — P. 73—80.

Rudenko Z.G. Problem of interdependent projects portfolio optimization. — N 5. — P. 67—70.

Shatov D.V. Delay identification by finite-frequency method. — N 4. — P. 2—8.

Shherbatov I.A. Distribution of local goals in the component structures of complex poorly formalizable systems. — N 1. — P. 19—29.

Shmatov G.A. Risk management methods in mass-media advertising. — N 5. — P. 71—75.

Sizykh D.S., Sizykh N.V. Methods for express evaluation of the financial condition of company. P. 1: The model of the matrix balance. — N 2. — P. 60—67.

Sizykh D.S., Sizykh N.V. Methods for express evaluation of the financial condition of company. Path 2. methods for evaluation of absolute indicators. — N 3. — P. 49—58.

Sokolov N.L., Zakharov P.A. About a new approach to the structure creation of a system of information and analytical support of autonomous spacecraft control. — N 6. — P. 62—69.

Solomatin A.N., Khachaturov V.R. Control methods of implementation of regional development strategy. — N 6. — P. 53—61.

Spirina V.S. Statement of commercial real estate management problem with consideration of consumer preferences. — N 1. — P. 81—86.

Systems identification on the way to creation of general theory of control object identification. — N 3. — P. 79—83.

Tsykunov A.M. Tracking system for object with the distributed delay in conditions of disturbances and noises. — N 5. — P. 20—26.

Vovenko T.A., Volkovitsky A.K., Pavlov B.V., et al. Onboard measurements of physical fields. — N 3. — P. 59—68.

XXII International conference «Complex systems safety control problems». — N 2. — P. 75—78.

Zverev O.V., Khametov V.M. Quantile hedging of european options in incomplete markets. Path 2. Minimax hedging. — N 1. — P. 47—52.
