
INDEX OF PAPERS PUBLISHED IN 2018

Afnas'ev V.N., Matveeva N.A. Construction of control for non-linear system with quasi-constant regulator parameters. — N 1. — P. 37—46.

Aleksander Aleksandrovich Dorofeyuk. — N 3. — P. 81.

Babaev D.I., Poletikin A.G., Promyslov V.G., Timofeev M.Yu. Managing the cybersecurity architecture of automated process control systems of nuclear power plants. — N 3. — P. 47—55.

Babushkina N.A., Kuzina E.A., Loos A.A., Belyaeva E.V. Results of the antitumor viral vaccine introduction regimens study based on mathematical modeling. — N 4. — P. 61—70.

Bauer V.P., Zatsarinny A.A., Ilyin N.I., et al. Disruptive situational control. — N 5. — P. 31—38.

Belov M.V., Novikov D.A. Foundations of the complex activity theory. Part 1. The structures of complex activity. Uncertainty and generation of complex activity. — N 4. — P. 36—45.

- Belov M.V., Novikov D.A.** Foundations of the complex activity theory. Part 2. Life cycles of complex activity. Organization and management as a complex activity. — N 5. — P. 39–48.
- Belov M.V., Novikov D.A.** Network active systems: planning and stimulation models. — N 1. — P. 47–57.
- Blyumin S.L., Borovkova G.S.** Application of analysis of finite fluctuations and reverse computations in control systems and decision support systems. — N 6. — P. 29–34.
- Bogomolov A.S., Ivashchenko V.A., Kushnikov V.A., et al.** Modeling complex for critical events combinations analysis in aviation transport systems. — N 1. — P. 74–79.
- Chadaev A.I., Tropova E.I.** Increase in safety injectoin of the carrier rocket «Souz-2» by forecasting of fuel use at the multiblok i rocket stage. — N 6. — P. 83–85.
- Demenkov N.P., Mikrin E.A., Mochalov I.A.** Fuzzy two-point boundary value problems in mathematical modeling and control. Part 1. Fuzzy mathematical modeling. — N 1. — P. 30–36.
- Demenkov N.P., Mikrin E.A., Mochalov I.A.** Fuzzy two-point boundary value problems in mathematical modeling and control. Part 2. Fuzzy control. — N 2. — P. 31–39.
- Galyaev A.A., Lysenko P.V.** Minimum-time control problem for elastic and visco-elastic interaction between body and surface. — N 4. — P. 14–20.
- Granin S.S., Mandel A.S.** Optimization of inventory management process in a supply chain having alternative suppliers. — N 6. — P. 24–28.
- Gribanova E.B.** Algorithms of information diffusion modeling in marketing activities within the groups of online social network. — N 1. — P. 66–73.
- Gusev V.B.** Models of autonomous control in the developing systems. — N 6. — P. 2–17.
- Ivanov N.N.** Generalized stochastic networks with non-standard events execution disciplines. — N 5. — P. 26–30.
- Klochkov V.V., Rozhdestvenskaya S.M.** Youth grants as a management tool for science development: effectiveness analysis. — N 3. — P. 8–16.
- Kvinto Ya.I., Khlebnikov M.V.** Upper estimates of large deviations in linear systems in presence of uncertainty. — N 3. — P. 2–7.
- Mayer R.V.** Information-cybernetic approach to the study of didactic systems. — N 5. — P. 66–72.
- Mitrishkin Yu.V., Kartsev N.M., Pavlova E.A., et al.** Plasma control in tokamaks. Part 2. Magnetic plasma control systems. — N 2. — P. 2–30.
- Mitrishkin Yu.V., Korenev P.S., Prokhorov A.A., et al.** Plasma control in tokamaks. Part 1. Controlled thermonuclear fusion problem. Tokamaks. control systems components. — N 1. — P. 2–20.
- Muranov A.A.** The analysis of work of onboard terminal systems in monoblock liquid launch vehicles at the abnormal expenditure of fuel components. — N 5. — P. 73–78.
- Podlazov V.S.** Conflict-free self-routing for a three-dimensional complete multiring. — N 4. — P. 54–60.
- Podlazov V.S.** Conflict-free self-routing for three-dimensional generalized hypercube. — N 3. — P. 26–32.
- Postnov S.S.** Optimal control problems for certain linear fractional-order systems given by equations with hilfer derivative. — N 5. — P. 14–25.
- Postnova E.A.** Optimal motion control of the system modeled by double integrator of fractional order. — N 2. — P. 40–46.
- Pshikhopov V.Kh., Medvedev M.Yu.** Multi-loop adaptive control of mobile objects in solving trajectory tracking tasks. — N 6. — P. 62–72.
- Rapopot L.B.** Application of the semi-definite relaxation method to the attitude determination of the rigid body. — N 5. — P. 79–83.
- Rezchikov A.F., Tverdokhlebov V.A.** Method of recurrent and z-recurrent control of complex system functioning. — N 3. — P. 56–64.
- Rusev V.N., Skorikov A.V.** Approximations of the renewal function and operating costs management strategy. — N 4. — P. 28–35.
- Shalaginova Z.I.** Development of methods of quantitative substantiation of intermediate control units arrangement places in large heat supply systems. — N 6. — P. 44–54.
- Shchepkin A.V.** Cost-reducing funding mechanisms. — N 3. — P. 17–25.
- Shevchenko A.M., Nachinkina G.N., Gorodnova M.V.** Efficient algorithms development for predicting the braking mode of the aircraft. — N 2. — P. 66–74.
- Shishov B.A.** Cognitive load estimation on the basis of video information using recurrent neural networks. — N 2. — P. 58–65.
- Shvedov A.S.** Functions approximating by neural networks and fuzzy systems. — N 1. — P. 21–29.
- Sidelnikov Yu.V., Ryapukhin A.V.** Improving the effectiveness of meetings in small groups. Part 1. Traditional approaches to the problem. — N 6. — P. 18–23.
- Silich M.P., Silich V.A., Axyonov S.V.** Methods of hierarchical hybrid cognitive map factors estimation on the example of assessment of energy consumption in regions. — N 1. — P. 58–65.
- Sirotyuk V.O.** Formalized models and methods for analyzing and assessing the completeness of patent information funds (using the example of an international patent organization). — N 6. — P. 35–43.
- Sokolov S.V., Sakharova L.V., Manin A.A.** Stochastic control of the maneuver to bypass the group of the moving spatial domains. — N 6. — P. 73–82.
- Somov S.K.** Creation of information-technological reserve in distributed data processing systems. — N 3. — P. 40–46.
- Somov S.K.** The problem of the optimal placing of the information-technological backup in distributed data processing systems. — N 4. — P. 46–53.
- Stetsyura G.G.** Network information-computing support of automatic mobile objects interaction. — N 5. — P. 56–65.
- THE 10th International conference «Management of large-scale system development MLSD?2017».** — N 3. — P. 76–80.
- Tsirlin A.M., Hovsepyan V.S.** Robust stability and selection of regulators settings for technological objects with delay. — N 4. — P. 21–27.
- Tsodikov Yu.M.** Successive linear programming method efficiency in solving the problems of production planning at oil refinery. — N 6. — P. 55–61.
- Tsyganov V.V.** The correct adaptive mechanisms with identification. — N 2. — P. 47–57.
- Vasiliev G.A., Kazakov V.G., Tarakanov A.F.** Game-theoretical modeling of confrontation between the parties based on the reflexive control. — N 5. — P. 49–55.
- Vedeshnikov V.A.** Method of controlling test construction for digital systems with minimal quasicomplete graph structure (on example of graph by dimension 11×11). — N 3. — P. 33–39.
- Veresnikov G.S., Egorov N.A., Kulida E.L., Lebedev V.G.** Methods for solving of the aircraft landing problem. Part 1. Exact solution methods. — N 4. — P. 2–13.
- Veresnikov G.S., Egorov N.A., Kulida E.L., Lebedev V.G.** Methods for solving of the aircraft landing problem. Part 2. Approximate solution methods. — N 5. — P. 2–13.
- XXV International conference «The problems of complex systems security management».** — N 2. — P. 75–79.
- Zavatsky V.K., Ivanov V.P., Kablova E.B., Klenovaya L.G.** Integration of the flow and level measurement information for propellant consumption control systems. — N 4. — P. 71–77.
- Zhilyakova L.Yu., Kuznetsov N.A., Matiukhin V.G., et al.** Locomotive assignment graph model for freight traffic on linear section of railway. The problem of finding a maximal independent schedule coverage. — N 3. — P. 65–75.
