

# INDEX OF PAPERS PUBLISHED IN 2008

- Abramova N.A. and Kovriga S.V.** Some validity criteria of models based on cognitive maps. — N 6. — P. 23–33.
- Abramyants T.G., Maslov E.P., Yakhno V.P.** On moving objects deviation from detection in 2-D and 3-D. — N 3. — P. 2–13.
- Ageev R.P., Nikiforov S.V., Andryushina N.A.** On the spectrum of a ring-structured directed graph's adjacency matrix and its application. — N 4. — P. 11–15.
- Aksyonova G.P.** On functional diagnosis of discrete devices under imperfect data processing conditions. — N 5. — P. 62–66.
- Ambartsumian A.A., Branishtov S.A.** A model of process regulations in industrial automation systems. — N 3. — P. 73–77.
- Asratian R.E.** Server-to-server routing of HTTP/SOAP-interactions in distributed systems. — N 5. — P. 57–61.
- Bahtizin A.R.** Application of CGE models for estimating the efficiency of managerial decisions. — N 5. — P. 36–42.
- Baikin A.A., Ivanov E.Yu., Isaeva O.V.** Vendor selection management subject to market information influence. — N 4. — P. 55–64.
- Borisov V.G., Nachinkina G.N. and Shevchenko A.M.** Modal method of optimization of energy flight control system of flying vehicles. — N 6. — P. 74–80.
- Burkov V.N., Isakov M.B., Korghin N.A.** Application of generalized median schemes for the design of strategy-proof multicriterion active expertise mechanisms. — N 4. — P. 38–47.
- Burkova I.V.** Network programming technique in the symmetric traveling salesman problem. — N 4. — P. 7–10.
- Chebotarev P.Yu., Loginov A.K., Tsodikova Ya.Yu., Lezina Z.M., Borzenko V.I.** Analysis of collectivism and egoism in the context of social welfare. — N 4. — P. 30–37.
- Cognitive analysis and situation control: methodology, theory and practice problems.** — N 3. — P. 85–87.
- Dorofeyuk J.A.** Structurally-classification methods for analysis and forecasting in large-scale control systems. — N 4. — P. 78–83.
- Drozd A.V.** An untraditional view on operational diagnostics of computing devices. — N 2. — P. 48–56.
- Furtat I.B., Tsykunov A.M.** Robust control of unsteady-state nonlinear structurally undefined objects. — N 5. — P. 2–7.
- Garkina I.A. and Danilov A.M.** Materials with special characteristics quality control. — N 6. — P. 67–73.
- Ghilyazov R.L., Ghitman M.B., Stolbov V.Yu.** Management of the transport network with fuzzy preferences. — N 1. — P. 62–67.
- Grebenuk E.A.** The models of pollution concentration time changes in atmosphere. — N 6. — P. 42–50.
- Gusev V.B.** Multi-parameter continuous scales debugging. — N 1. — P. 36–42.
- Index of papers published in 2008.** — N 6. — P. 96–97.
- «Innovations Control — 2007»: Theory and Practice Problems.** — N 1. — P. 73–79.
- Inzhevatin E.V., Negovorova V.A., Savchenko A.A., et al.** Threshold effects in the control of population dynamics of cancer cells in an organism. — N 5. — P. 73–79.
- Itzkovich E.L. and Uortchenko V.E.** Procedure of enterprise financial resources distribution among subject-various innovation projects. — N 6. — P. 51–58.
- Kavalerov M.V., Matushkin N.N.** Task scheduling in automation and control systems under real-time linear interval constraints. — N 1. — P. 51–61.
- Kirin Yu.P., Zatonsky A.V., Bekker V.F., Kraev S.L.** Process identification problems in spongy titanium production. — N 4. — P. 71–77.
- Kleparsky V.G., Kleparskaya Ek.V.** Evaluation of management adequacy in transition on intensive development trajectory. — N 3. — P. 59–63.
- Kleschev A.S.** A concept of a mathematical knowledge bank for scientific research. P. 1. A metaphor. — N 4. — P. 2–6.
- Kleschev A.S.** A concept of a mathematical knowledge bank for scientific research. P. 2. Interactive formation of intuitive proofs. — N 5. — P. 26–30.
- Kornoushenko E.K.** Methodological aspects of practical regression estimation. — N 2. — P. 34–41.
- Krasnova S.A., Utkin V.A., Utkin A.V., Nguyen Thanh Tien.** A direct control system synthesis method for end effector arm under incomplete easurements. — N 1. — P. 10–18.
- Kubyshev V.A., Sukhoverov V.S.** Mobile heating source simulation and control system using MATLAB software tools. — N 2. — P. 64–69.
- Kudinov U.I. and Kudinov I.U.** Fuzzy modeling and clustering. — N 6. — P. 2–10.
- Kuvshinov B.M., Chelyadin A.S., Shiryaev V.I.** Multicriterion competitiveness evaluation and the ranking of economic objects operating under various uncertainty conditions. — N 4. — P. 48–54.
- Leonov G.A.** Dynamic principles of prediction and control. — N 5. — P. 31–35.
- Losev A.G., Radchik M.V.** On a descriptive optimization model of medium-term planning. — N 2. — P. 42–47.
- Lyamina M.A.** Influence of multiplicative effect on balance of investments and savings in housing sector. — N 6. — P. 59–66.
- Mahutov N.A., Solozhentsev E.D.** Management and logical-and-probabilistic risk models with groups of incompatible event. — N 2. — P. 2–11.
- Mihnenko P.A.** Application of random jump structure system theory for the models of modern organizations. — N 6. — P. 34–41.
- Mitrishkin Yu.V., Korostelev A.Ya.** A system with predictive model for plasma shape and current control in a tokamak. — N 5. — P. 19–25.

- Novikov D.A.** «Cognitive games» a linear step-function model. — N 3. — P. 14–22.
- Pankova L.A., Pronina V.A.** Informational and analytical support of housing and communal services management (capital maintenance planning). — N 5. — P. 49–56.
- Parsheva E.A.** A modified high order adaptation algorithm for decentralized control of multivariable plants with state delay. — N 3. — P. 37–43.
- Paveliev V.V., Paveliev S.V.** Selecting the protection system variants for data processing centers. — N 5. — P. 67–72.
- Podlazova A.V.** Genetic algorithms with solution examples. — N 6. — P. 57–63.
- Ponomarenko V.S., Listrov S.V.** A method for solving least coverage problems as a GRID planning tool. — N 3. — P. 78–84.
- Popov E.V., Kononov A.A.** A model of information retrieval costs optimization. — N 3. — P. 69–72.
- Rodionova A.G.** On piecewise constant control switching moments in a linear steady-state second-order control problem with complex eigenvalues. — N 6. — P. 81–83.
- Rykov A.S., Matvienko M.Yu.** Non-differentiable 2-D ravine test functions. — N 4. — P. 16–19.
- Saraev P.V.** Optimal multistep neurocontrol. — N 5. — P. 14–18.
- Schepetov A.G.** Optimal transient and frequency response curve shapes for a linear dynamic system. — N 3. — P. 30–36.
- Sedova N.O.** Control functionals in delay system stabilization problem. — N 3. — P. 23–29.
- Shibaeva N.A.** Efficiency evaluation techniques for social investments. — N 3. — P. 64–68.
- Shubin A.B., Alexandrov E.G., Harchenkov G.G.** The synthesis of a predicting algorithm for the programmed reorientation of a large space structure with variable parameters. — N 2. — P. 70–75.
- Shublazde A.M., Popad'ko V.E., Kuznetsov S.I., Yakusheva A.A.** Investigation of the solutions optimal with respect to the degree of stability at proportional-plus-integral control. — N 2. — P. 12–20.
- Sidorov A.A., Silich M.P.** Complex evaluation of municipal unit's demographic development. — N 1. — P. 29–35.
- Sokolov S.V., Kucherenko P.A.** Generalized probabilistic criteria in the nonlinear parametric identification problem. — N 4. — P. 24–29.
- Spiro A.G.** Stock market price gaps: classification and properties. — N 2. — P. 30–33.
- Strakhov A.F., Strakhov O.A.** Application of population accounting technologies for reliable prediction and efficient management of demographic and socioeconomic processes. — N 2. — P. 21–29.
- Sukharev O.S.** Macroeconomic policy for economic growth stimulation: constraints and prospect. — N 1. — P. 19–28.
- The 1<sup>st</sup> International Conference «Management of Large-Scale System Development» (MLSD'2007).** — N 2. — P. 76–84.
- The 3<sup>rd</sup> All-Russian Youth Conference on Control Problems.** — N 5. — P. 81–86.
- The 6<sup>th</sup> International Conference «Computer-Aided Design of Discrete Systems».** — N 2. — P. 85–86.
- 35<sup>th</sup> Anniversary of the System «Sirena».** — N 1. — P. 83.
- Tselikov A.V.** An analytical system for informational support of municipal healthcare management. — N 1. — P. 68–72.
- Tsyganov V.V., Kadyomov D.S.** Anagement mechanisms for socio-economic system. — N 3. — P. 49–58.
- Vladimir Lazarevich Epstein**. — N 6. — P. 84–85.
- XIV International Conference «The Problems of Compound Systems Safety Management».** — N 1. — P. 80–83.
- Yakovenko G.N.** Controllable systems robust with respect to initial data. — N 4. — P. 20–23.
- Zaikin O.S., Semenov A.A.** Large-block parallelism technology in SAT problems. — N 1. — P. 43–50.
- Zemlyakov S.D., Danilova E.A.** Nonstationary relay control system: a solution for the task of convergence domain search. — N 6. — P. 18–22.
- Zemlyakov S.D., Danilova E.A.** On the problem of convergence domain search for the motion of a nonstationary relay system. — N 1. — P. 2–9.
- Zhevnerov V.A.** Parameters evolution techniques in nonlinear network problems with a case study of the optimization of incoming load flows distribution. — N 4. — P. 65–70.
- Zhirabok A.N.** Canonical forms of nonlinear dynamic systems. — N 6. — P. 11–17.
- Zhukov V.P.** On roughness conditions for unstable nonautonomous linear systems in terms of stability type preservation. — N 3. — P. 44–48.
- Zhukov V.P.** On the roughness of nonlinear dynamic systems. — N 5. — P. 8–13.
- Chkhartishvili A.G.** Reflexive games: informational structure transformation. — N 5. — P. 43–48.
