- Файзрахманов Р.А., Кычкин А.В.** Алгоритмическое и программное обеспечение информационной системы диагностики атеросклероза. — № 2. — С. 66—70.
- Федорец О.В.** Использование обучающей выборки для определения приоритета критериев в рейтинговой системе оценивания научных журналов. — № 1. — С. 59—65.
- Федосеев С.А., Вожаков А.В., Гитман М.Б.** Управление производством на тактическом уровне планирования в условиях нечеткой исходной информации. — № 5. — С. 36—43.
- Фетисов В.Н.** Эффективное применение многоядерных микропроцессоров для реализации алгоритмов управления стохастическим объектом. — № 6. — С. 76—80.
- Ходашинский И.А.** Идентификация нечетких систем: методы и алгоритмы. — № 4. — С. 15—23.
- Цыкунов А. М.** Робастное управление линейным объектом по косвенным измерениям. — № 3. — С. 13—22.
- IV международная** научная конференция «Проблемы регионального и муниципального управления». — № 4. — С. 83—86.
- XVI международная** конференция «Управление безопасностью сложных систем». — № 2. — С. 72—75.
- Щербаков П.С.** Построение регуляторов заданной структуры при соблюдении инженерных требований. — № 5. — С. 9—17.
- Ягудин С.Ю., Дубов Л.Ю.** Развитие полимерного комплекса региона на базе кластерного подхода (на примере Самарской области). — № 2. — С. 47—51.

INDEX OF PAPERS PUBLISHED IN 2009

- Abramyantz T.G., Belanov Yu.A., Maslov E.P., and Yahno V.P.** Search of moving target by its informative character «trace». Part I: The general structure of optimal search trajectory. — N 5. — P. 61—68.
- Abramyantz T.G., Belanov Yu.A., Maslov E.P., and Yahno V.P.** Search of moving target by its informative character «trace». Part II: The optimization of search trajectories. — N 6. — P. 44—51.
- Afanaseva K.E., and Shiryaev V.I.** Adaptive guaranteed estimation using the information on the set of «relative objects». — N 1. — P. 22—26.
- Afanasyev V.N., and Bovshuk E.R.** Construction of robust control for bilinear object with parametric uncertainty. — N 3. — P. 27—32.
- Agaronyan O.S.** Hierarchical adaptive image segmentation. — N 4. — P. 74—79.
- Alekseeva A.I.** On the methodological substantiation of theory and practice of business analysis. — N 5. — P. 74—80.
- Alexandrov A.G., and Orlov Yu. F.** Finite-frequency identification: dynamic algorithm. — N 4. — P. 2—8.
- Andrienko A.Ya., and Ivanov V.P.** Improvement of power characteristics of liquid-propellant rockets by means of automatic control. Part I: Physicotechnical bases of fuel consumption control. — N 1. — P. 66—71.
- Andrienko A.Ya., and Ivanov V.P.** Improvement of power characteristics of liquid-propellant rockets by means of automatic control. Part II: Onboard fuel consumption control systems. — N 2. — P. 59—65.
- Andrienko A.Ya., Losev G.P., and Tropova E.I.** Improvement of operation algorithms of flow-measuring contours of a launch vehicle control system. — N 4. — P. 46—51.

- Asratian R.E.** Modeling of multi-computer control systems in virtual machines system. — N 3. — P. 69–75.
- Bahtadze N.N., and Lototsky V.A.** Contemporary methods of production process control. — N 3.1. — P. 56–63.
- Barminsky A.V.** Technical efficiency and estimation of an expected production volume in the view of the stochastic frontier production function concept. — N 2. — P. 40–46.
- Bobrikov N.M., Denisov I.K., Kuznetsov S.I., and Shubladze A.M.** Automatic search for settings of PI- and PID-regulators optimal with respect to the degree of stability. — N 2. — P. 8–13.
- Bolodurina I.P., Lugovskova Ul.P.** Optimum control of human immune reactions. — N 5. — P. 44–52.
- Borisov V.G., Danilova S.K., and Chinakal V.O.** Research aimed at creation of perspective maritime mobile vehicles control systems and training systems development. — N 3.1. — P. 103–106.
- Bukharin S.N.** On the reasons of regional ecological infowars. — N 5. — P. 18–21.
- Bunich A.L.** Singular issues of control systems design for linear discrete plants. — N 5. — P. 2–8.
- Burkov V.N., and Novikov D.A.** Active systems theory (history of development). — N 3.1. — P. 29–35.
- Burkov V.N., Novikov D.A., and Shchepkin A.V.** Models and mechanisms for ecological-economic systems management. — N 1. — P. 2–7.
- Dorofeyuk A.A.** Expert-ranging analysis methodology in complex organized data processing and control problems (history of development and perspectives). — N 3.1. — P. 19–28.
- Dorri M.Kh., and Roschin A.A.** The software tool RDS (Research of Dynamic Systems) for simulation and development of control systems. — N 4. — P. 52–57.
- Dorry M.Ch.** Automation control of marine vessels. — N 3.1. — P. 94–102.
- Dubina I.N.** Models of innovation activities and optimal innovation profit sharing. — N 3. — P. 61–68.
- Durnev R.A.** Ystem of informing and warning of population: proof of reasonable function capacity. — N 1. — P. 72–75.
- Dyomin N.S., and Kuleshova E.V.** Management of one-sector economy in the presence of restrictions on saving and consumption. — N 6. — P. 9–17.
- Dyomkin I.V., and Pertsev D.V.** Evaluation procedure of an innovative projects portfolio integrated risk. Part 2: Methodical features of estimation of an innovative projects portfolio integrated risk. — N 4. — P. 39–45.
- Dyomkin I.V., and Pertsev D.V.** Evaluation procedure of innovative projects portfolio integrated risk. Part 1: Analysis of basic approaches to estimation of projects portfolio integrated risk. — N 3. — P. 54–60.
- Dzhashitov V.E., Pankratov V.M., Reztchikov A.F., and Dzhashitov A.E.** Mathematical modelling and control in systems of informing and an informational interchanging in a society. — N 6. — P. 2–8.
- E.A. Fedosov** (to the 80-th anniversary). — N 3. — P. 77.
- Faizrahmanov R.A., and Kichkin A.V.** Algorithmic and software support for atherosclerosis diagnostics information system. — N 2. — P. 66–70.
- Fedorets O.V.** Use of learning sample to define a priority of criteria in scientific journals rating system. — N 1. — P. 59–65.
- Fedoseev S.A., Vozhakov A.V., Gitman M.B.** Production management on the tactical level of planning under the fuzzy initial information. — N 5. — P. 36–43.
- Fetisov V.N.** Effective application of multi-core microprocessors for implementation of control algorithms. — N 6. — P. 76–80.
- Gilyazov R.L., and Stolbov V.Yu.** One approach to allowing for hierarchical structure of optimality criteria of multi-service communication network. — N 1. — P. 44–52.
- Gladkov Yu.M., Martinov V.L., and Shelkov A.B.** Techniques and algorithms for estimation of backlog reimburse reserve in a social insurance system. — N 2. — P. 31–35.
- Goubko M.** Optimal management hierarchies for non-uniform cost functions. — N 3. — P. 44–53.
- Gubarov D.A., Novikov D.A., and Chkhartishvili A.G.** Informational influence and information control models in social networks. — N 5. — P. 28–35.
- Gusev S.S., and Chadeev V.M.** Identification algorithm with transition in the parameters domain. — N 1. — P. 18–21.
- Gusev V.B., and Kosjanenko A.V.** Estimation of influence of government order on the reproduction of gross domestic product. — N 2. — P. 24–30.
- Hodashinsky I.A.** Identification of fuzzy systems: methods and algorithms. — N 4. — P. 15–23.
- Index** of papers published in 2009. — N 6. — P. 82–86.
- «**Innovation Management — 2008**»: innovation processes on the brink of economic crisis. — N 2. — P. 76–80.
- IV International** scientific conference «The problems of regional and municipal management». — N 4. — P. 83–86.
- Jagudin S.Ju., and Dubov L.Ju.** Regional polymeric complex development on the basis of cluster method (by the example of Samara region). — N 2. — P. 47–51.
- Kleparskiy V.G.** The estimation of components of control effectiveness for some countries based on the method of «passive» experiment. — N 2. — P. 36–39.
- Klimchenko V.V.** Modification of the multichannel Levinson recursion. — N 2. — P. 2–7.
- Kononov O.A., and Kononova O.V.** Social and ethic aspects of information security ensuring. — N 1. — P. 76–79.
- Korgin N.A.** Feasibility of multi-criteria expertise results verification — «intersection» property application. — N 6. — P. 18–27.
- Kubyshev V.A., and Finyagina V.I.** Use of mobile control methods for optimization of temperature regimes for plazmotron electrodes. — N 5. — P. 53–60.
- Kulba V.V., Kosjachenko S.A., and Lebedev V.N.** Computerized information management systems within social-economic and organizational institutions. — N 3.1. — P. 73–86.

- Kurdukov A.P., and Timin V.N.** H_∞ power system emergency management. Part II: Synthesis of the robust regulator for power system management. — N 2. — P. 14–23.
- Kurdukov A.P., and Timin V.N.** H_∞ -power system emergency management. Part I: Theoretical basis of robust H_∞ -regulators synthesis. — N 1. — P. 8–17.
- Kuznetsov O.P.** Intellectualization of control decisions support and creation of intellectual systems in the RAS Institute of Control Sciences. — N 3.1. — P. 64–72.
- Main** results of investigations and development on technical means and automation systems. — N 3.1. — P. 36–55.
- Mikhnenko P.A.** Optimization of economic organization adaptation to environment changes. — N 4. — P. 32–38.
- Morozov M.V.** Robust stability conditions for linear nonstationary control systems with periodic interval constraints. — N 3. — P. 23–26.
- Nikitin V.V.** Expert-classification methods for designing professional and educational standards. — N 1. — P. 38–43.
- Nikolaychuk O.A.** Modelling of knowledge for research of unique object technical state dynamics. — N 4. — P. 58–65.
- Nizhegorodtsev R.M.** Managing disorder: global lessons from the economic crisis. — N 3. — P. 33–43.
- Polyak B.T.** Research on automatic control theory. — N 3.1. — P. 13–18.
- Popov E.V., and Shmatov G.A.** Theory of media reach calculation. — N 5. — P. 22–27.
- Pronina V.A., and Shipilina L.B.** Using relations of attributes for building ontology of subject domain. — N 1. — P. 27–32.
- Rutkovsky V. Yu.** The control of spacecrafts and aeroplanes. — N 3.1. — P. 87–93.
- S.V. Emelyanov** (to the 80-th anniversary). — N 3. — P. 76.
- Saakian A.A.** Investigation of quality measures for speech recognition systems. — N 4. — P. 66–73.
- Scherbakov P.S.** Composition of regulators of given structure subject to meeting the engineering terms. — N 5. — P. 9–17.
- Second International Conference «Large-scale Systems Control» MLSD'2008** (analytical review). — N 3. — P. 78–87.
- Seventy years** of native control science evolution and formation: Institute of Control Sciences is 70. — N 3. — P. 2–12.
- Silaev A.V.** The algorithm of parameter adaptation of a base orientation control law for a large space structure on the base of flexible modes envelope estimation. — N 2. — P. 52–58.
- Soultanov R.A., Slabnov V.D., Foukin I.A., and Skvortsov V.V.** To a problem of optimum oil production process control with application of probability law of distribution for some parameter of laminated layer. — N 6. — P. 28–34.
- Stanislav Danilovich Zemlyakov**. — N 5. — P. 87.
- Suhoverov V.S., and Romanov G.A.** Modeling of hormone-controlled bipolar growth of plant-type cellular structures. — N 6. — P. 35–43.
- System** identification is on the way towards creation of methodological and logical-mathematical grounds for science intensive technologies of structure identification. — N 5. — P. 81–86.
- The all-Russian seminar «Modern methods of navigation and motion control: information-control systems of autonomous moving objects».** — N 4. — P. 80–82.
- Tsykunov A.M.** Robust control of linear object by indirect measurements. — N 3. — P. 13–22.
- Tverdohlebov V.A.** Estimation of complexity of movement control along the known route. — N 5. — P. 69–73.
- 22nd European Conference on Modelling and Simulation — ECMS 2008.** — N 1. — P. 80–82.
- Utkin L.V., Zatenko S.I., and Coolen F.** New interval Bayesian software reliability models on the basis of the non-homogeneous Poisson processes. — N 6. — P. 52–58.
- Vedeshenkov V.A.** The organization of system diagnosis of digital systems with symmetric bipartite graph's structures. — N 6. — P. 59–67.
- Vishnevsky V.M., and Zhelezov R.V.** Principles of design and development of information system for finding optimal path in public transport. — N 1. — P. 33–37.
- Vladimir Nikolaevich Burkov** (to the 70-th anniversary). — N 6. — P. 81.
- Vladislav Julevich Rutkovsky** (to the 80-th anniversary). — N 2. — P. 71.
- XVI International Conference «Complex systems safety control problems».** — N 2. — P. 72–75.
- Zadorozhnyi V.N.** Optimization nonmarkovian of queueing networks. — N 6. — P. 68–75.
- Zavgorodniy V.I.** System management of information risks: choice of mechanisms for protection against information risks. — N 1. — P. 53–58.
- Zhukov V.P.** Sufficient roughness conditions of non-autonomous nonlinear dynamic system in the sense of stability type conservation. — N 4. — P. 9–14.
- Zolotova T.V.** Corporate model of interest's coordination in view of ecological factors. — N 4. — P. 24–31.
